

Classic Mesh:

Many of our dealers have asked us for a cover built to compete in the lower end safety cover market. Classic mesh covers still have the precise fit and finish we are known for, but without the upgraded materials used in our other covers. Classic mesh is an entry level safety cover.

Dura-Mesh:

Increased filament sizes and increased number of filaments used, means your Dura-Mesh cover is designed to outperform any other standard mesh cover on the market. By tightening the weave of the filaments and increasing the filament size itself, Dura-Mesh allows much less sand, silt and debris to pass through the cover, while still allowing for rain and melting snow to pass through. Providing 91% shade Dura-Mesh means a cleaner pool in the spring. By using thicker filaments in a denser weave, Dura-Mesh is designed for superior performance under harsh conditions. Dura-Mesh is made with higher abrasion resistance to last longer.

- 14% Thicker
- 20% Increase in Tensile Strength in length
- 60% Increase in Tensile Strength in the width
- 40% Stronger Burst Strength
- Significantly better filtration of debris from other standard mesh materials

Smart-Mesh™ *** Patent Approved ***

- Smart-Mesh is not just another mesh cover! This revolutionary product will give you an edge over your competition. Offer your customers something different, something that works.
- 100% Shade minimizes algae risk
- Average filtration down to 40 microns. (Sand filters typically filter to 20-30 microns.)
- Smart-Mesh is 40% lighter than solid cover material.

<p>Drop Down Design 127 lb./inch compression rate! 7.5" long uncompressed, attaches straps to anchors Stainless Steel Spring (Standard) (SSS)</p>	<p>Commercial Double Spring (CSSS)</p>	<p>Attaches to coping underneath straps. Prevents damage to sensitive coping. Coping Clip (CC)</p>																								
<p>5" long, no charge replacement for standard spring where decking is short * Used for deck widths of 26" from water's edge Short Stainless Steel Spring (SSSS)</p>	<p>Stainless Steel "D" Ring Spring (DSSS)</p>	<p>Hooks cover onto cable assembly can be used for pool and spa combo spa cover attachments. Snap Hook (SH)</p>																								
<p>Solid Brass, sits in decking to anchor cover, fits into 3/4" hole Brass Anchor (BPU)</p>	<p>Allows spring to buckle onto webbing Stainless Steel Buckle (SSB)</p>	<p>Used in direct cover to anchor hookups (Not recommended due to weight loads that the cover can be subjected to.) D-Ring (DR)</p>																								
<p>Solid Brass, used with wooden decks, fits into 3/4" hole, with screws Wood Deck Anchor (WDPU)</p>	<p>Works in conjunction with Brass Anchors in dirt, grass, or other soft earth installations, as well as brick and sand installations Aluminum Tube Only (T) Aluminum Tube with Anchor (TA)</p>	<p>Holds one end of steel cable, allows cable to be tightened Turnbuckle (TB)</p>																								
<p>Hexagonal head fits into anchor slot Allen Wrench / Hex Key (AW)</p>	<p>Replaces brass anchors in dirt, grass or other soft earth installations (not recommended for entire cover) Aluminum Lawn Stake (LS)</p>	<p>Used on perimeter padding, holds material in place Grip Clip (GC)</p>																								
<p>Necessary for the installation and removal of cover Stainless Steel Installation Tool (ITS) Steel Installation Tool (IT)</p>	<p>Cover hooks onto cable with snap hooks for flush fit along the raised wall area Stainless Steel Cable (SSC)</p>	<p>Same as single, used to hold gap filler in place Double Grip Clip (DGC)</p>																								
<p>Hides chipped concrete around drill holes Brass flange (BF)</p>	<p>Low profile, attractive design. Holds cable closer to feature and allows for cable to be slid in. Stainless Steel Lag shield is drilled into raised wall to guide cable, eyebolt screws into lag. Lag fits into 1/2" hole. Requires special tamp tool. Eyebolt with Drop In (SSED) Drop In Only (SSDI) Tamp Tool for Drop In (TTDI)</p>	<p>Self Adhesive Cover Patch, 8.5"x11" Sheet Safety Cover Patch (Codes Below)</p> <table border="0"> <tr> <td>PATGR</td> <td>Green Dura</td> <td>PATTGR</td> <td>Green Smart</td> </tr> <tr> <td>PATBK</td> <td>Black Dura</td> <td>PATTBL</td> <td>Blue Smart</td> </tr> <tr> <td>PATBL</td> <td>Blue Dura</td> <td>PATCGR</td> <td>Green Adv.</td> </tr> <tr> <td>PATTN</td> <td>Tan Dura</td> <td>PATCBK</td> <td>Black Adv.</td> </tr> <tr> <td>PATSBL</td> <td>Blue Solid</td> <td>PATCBL</td> <td>Blue Adv.</td> </tr> <tr> <td>PATSGR</td> <td>Green Solid</td> <td>PATK</td> <td>Kaleido (Color)</td> </tr> </table>	PATGR	Green Dura	PATTGR	Green Smart	PATBK	Black Dura	PATTBL	Blue Smart	PATBL	Blue Dura	PATCGR	Green Adv.
